## DAY 2 REYKJAVIK

On this four hours tour we explore the world's most northern capital. A good start to your Iceland experience. This is a detailed and comprehensive introduction to Reykjavik's past and present. During this tour Reykjavik's main attractions are highlighted on foot and by bus. The main landmarks, such as The Pearl, Hallgrímskirkja church, the harbor and the famous 101 Reykjavik neighborhood are visited. We'll end the tour with a visit to the Northern Lights Museum.

The afternoon is at your leisure to explore the city on your own. It's possible to join an optional whale watching tour in the afternoon for those who wish (weather permitting).

After having dinner at the hotel in the evening we will head out to search for the Northern Lights. The Northern Lights, also known as Aurora Borealis, are caused by the interaction of particles from the sun with the upper atmosphere near the North Pole. We drive away from the city lights to areas where there is no light pollution to search for the northern lights. This is a natural phenomenon which can of course not be guaranteed. The locations visited during the Northern Lights tour vary from day to day depending on weather conditions. **BD**

## DAY 3 BORGARNES - DEILDATUNGHVER - HRAUNFOSSAR - REYKAHOLT - INTO THE GLACIER

We continue to historic Reykholt, where Snorri Sturluson once lived, a brilliant 13th-century writer/scholar. Next stop is a multitude of natural springs under a birch covered lava field, which creates a waterfall of hundreds of meters wide, the

magnificent Hraunfossar (Lava Falls), seemingly appearing out of nowhere across the bank. A few minutes' walk up the river is the Barnafoss (Children's Fall), which has carved out strange figures from the rock.

After having lunch, we begin a tour into the Langjökull Glacier and experience the inside through a manmade ice tunnel. After the tour we head back to the hotel, enjoy a dinner and relax in the outdoors hot bathtubs hopefully seeing the Northern Lights. **BD**
